

Sanctuary resolution

Key messages:

- It is our mission to educate every student who comes through our schools' doors.
- We already have policies that provide equal education opportunities to students regardless of citizenship and immigration status.
- It's not our role to ask for or collect information about citizenship or immigration status.
- We comply with what's required by law, but it is not required that we enforce federal immigration laws.
- This resolution simply reinforces our current policies and practices.
- It has been our practice that if an immigration official inquires about a student or family, they are referred to the MPS Office of General Counsel.
- General Counsel then requires valid authority in order to release any information the district may have about a student or family.
- It has been extremely rare for immigration officials to ask the district for information.
- We will continue to provide a safe and welcoming learning environment for our students and families.
